

ASHUTOSH AYUSH

Backend Developer

+91 70709 87772 | mrsahayy297@gmail.com | ashutoshworks.in | linkedin.com/in/Ashutosh-Ayush | github.com/Ashutosh-JavaDev

Professional Summary

Final-year MCA student at LNCT Bhopal specialising in backend engineering with Java, Spring Boot, and Microservices. Experienced in designing secure RESTful APIs, implementing JWT authentication, and improving system performance through CI/CD pipelines. Applies solid software engineering principles to write clean, maintainable, and efficient code.

Experience

Software Engineering Virtual Intern

Mar 2025 – Mar 2025

JPMorgan Chase & Co — Global Financial Services

Remote

- Solved 10+ enterprise fintech problem statements covering backend system design, distributed architecture, and secure data handling for platforms simulating 100,000+ concurrent users; applied JWT Authentication, Role-Based Authorization, and Secure REST Design.
- Completed 8 structured backend/data-pipeline modules and applied performance-optimisation techniques that reduced simulated system bottlenecks by up to 40%.

Software Development Intern

Jan 2025 – Mar 2025

Elite Tech (Elite Techno Groups) — Technology Solutions

Bhopal, India

- Built 3+ production-ready applications using Java, Spring Boot, Maven, and MySQL following RESTful API design principles, structured exception handling, and clean-code practices; managed 500+ concurrent user sessions with zero critical failures.
- Optimised relational schemas (normalisation + indexing) across 4+ apps, reducing query execution time by 25%; integrated SLF4J structured logging and Swagger/OpenAPI documentation, cutting debugging time by approximately 30%.
- Led 20+ Agile sprint sessions within a 4-member team across the full SDLC; maintained 90%+ coding-standard adherence over 8,000+ reviewed lines of code.

Education

Master of Computer Applications (MCA)

Sep 2024 – Jun 2026

Lakshmi Narain College of Technology, Bhopal

Bachelor of Science — Information Technology

Jul 2021 – Aug 2024

Marwari College, Bhagalpur

Technical Skills

Languages	Java, JavaScript
Frameworks	Spring Boot, Spring MVC, Hibernate/JPA, Node.js, React
APIs & Auth	REST API Design, JWT Authentication, OAuth, Swagger/OpenAPI
Architecture	Microservices, OOP, SOLID Principles, Clean Code, Design Patterns
Databases	MySQL, Oracle Cloud DB, Redis, JDBC
DevOps & Cloud	Docker, Kubernetes, AWS, Firebase, Render, CI/CD
Tools & Others	Maven, Git, SLF4J Logging, JUnit, Multithreading, Agile/SDLC

Projects

CycleCare — Full-Stack Menstrual Health Tracker

Tech: React · Node.js · Express.js · MySQL · Resend API

- Built a full-stack health tracking platform enabling users to log menstrual cycles, track symptoms, and manage personal health insights.
- Implemented JWT authentication and email OTP verification via Resend API to secure user onboarding.
- Designed relational database schemas to manage cycle logs, symptom tracking, and user activity analytics.

Pizza Mania — Desktop Food Ordering Application

Tech: Core Java · Swing · JDBC · MySQL · JUnit · Multithreading

- Developed 4 core modules processing 100+ transactions; applied SOLID principles along with Singleton and Factory design patterns across 2,000+ lines, reducing code duplication by 40%.
- Leveraged Java Multithreading for concurrent order processing; achieved approximately 80% logic coverage through JUnit tests; improved reliability via global exception handling and structured logging.

Certifications

- Oracle Cloud Database Certification
- Software Engineering Virtual Experience — JPMorgan Chase & Co
- Forward Programme Certification
